Special List No. 87

(Canceling Seedling List No. 83)

Unflowered Seedling Orchids :

Cattleyas, Laelio-Cattleyas, and Brasso-Cattleyas

SINCE issuing our last List No.82 on Established Exotic and Native Hardy Orchids we have had a great many calls for seedling plants and have therefore made up the following listing for your approval.

We have listed only such of our Hybrid seedling plants that are of special merit and that should prove ideal for the private as well as the commercial grower.

The majority of these plants are of strong, vigorous growth and should flower in their next season with few exceptions.

We believe we have the largest, varied, commercial collection of Orchids in the Country and specialize in the stocking of both private and commercial establishments.

For other species and varieties of Orchids as well as Orchid Culture Materials see our Special List No. 82.

We also list a few of the more popular books on Orchids and Orchid Culture. Also a new style of a wire Pot-hanger that is now in great demand.

In Ordering Please specify List Number.

May we hear from you on your Orchid requirements?
